Total Support for the Construction Industry!

info@globalsourceksa.com

www.globalsourceksa.com

GLOBAL SOURCE

is a leading supplier of
construction materials &
allied products.

LIFTING SOCKET RD & LIFTING LOOP

Tubular precast elements with through hole below the thread to take reinforcing bar, to provide secure anchorage. Loop aids transportation of panels with RD Lifting socket.

SANDWICH PANEL ACCESSORIES

Accessories to facilitate the production of Sandwich Panels in the Precast Industry. We offer Shear Anchors, V shaped Anchors, Connector Pins and other related accessories.

CAPSTAN ANCHOR & LIFTING SHACKLE

Capstan Anchor suitable for transport of concrete elements. Rebar reinforcement not required. Lifting Shackle aids transportation of panels with Capstan / I Anchor.

ERECTION ANCHOR, SPREAD ANCHOR, TWO HOLE ANCHOR & RING CLUTCH

Specially shaped anchor heads that allow pitching or turning loads by anchor, and not effecting the precast panel.

CONNECTING LOOP

Interrelated precast connecting component, elements with wire rope crimped firmly into externally threaded ferrule. Use to connect precast pannels to each other or to a coloumn.

CORRUGATED PIPE

Post tensioning duct are widely used in the construction industry, mainly as grout tubes. These ducts form a conduit to accommodate post tensioned elements and provides annular space for the grout.

PVC & STEEL CHAMFER , BACKUP ROD

Are used to form beveled or chamfered edge and angled groove line. These are reusable.

Are expansion joints which are Flexible, compressable, open cell polyurethane strips for silicone sealants.

SHIM PADS & HOLLOW CORE CAPS

Polymer pads used to align heavy precast or steel sections designed to withstand heavy loads without distortion or breakage.

Hollow Core Caps are grout stoppers placed at the slab ends. Available in all standard Hollow Core Slab sizes.

CLIP & WHEEL SPACER

Strong plastic component designed for supporting loads in precast or cast insitu concrete in horizontal position.

The Wheel Spacer has been designed as a strong and light weight reinforcement spacer for vertical precast concrete construction.

ELECTROFUSION WELDING MACHINE

Our electrofusion control units Made in Germany are of high quality and help you to carry out even the most demanding welding jobs reliably and safely. A powerhouse of technology is stored in these machines to give you the highest quality of welds even for large couplers

BUTT WELDING MACHINE

Our Butt Fusion Welding Machines are designed and built keeping in mind priorities of providing a trouble-free, easy to use and low-maintenance product to our customers. And our Vali Range of Butt Fusion Welding machines deliver on these priorities

SOCKET FUSION WELDING MACHINE

Fusion Welding Machines can be used at job site or factories. They are used to fuse pipes and fittings such as PE, PP etc.

EXTRUDERS

Leister Extruders are compact professional tools available in wide range. Gives Perfect seam quality, With best output

ROOFING

Developed and Designed to give high efficiency with best precision for roofing related applications. With ergonomic handling, and optimal machine guiding.

HOT AIR TOOLS

Leister Hot Air blowers are compact robust and best in class tools for wide range of professional application.

GEO MEMBRANE

Extremely robust welder, with welding speed of up to 12mtr/min. and weight of 16.4 Kg. Integrated display of parameters and a height adjustable chassis.

G-WELD WELDING RODS & STRIPS

A plastic welding rod, also known as a thermoplastic welding rod, is a rod with circular or triangular cross - section used to bind two pieces of plastic together. Available in PE, PP, PVC etc.

TECHNICAL TEXTILES

Accurate Welds are simple with Leister Tools. Welds with high accuracy for overlap seams and membranes. Movable swivel wheels, helps to get around obstacles.

HANDBAR - DIN EN 13101 TEST - ASTM C497

| | |
|-----------|------------------|
| Dimension | 200 X 230 mm |
| HB SS 015 | Stainless Steel |
| HB AL 017 | Aluminium |
| HB GS 019 | Galvanized Steel |

DIN EN 13101 TEST - ASTM C497

| | |
|-----------|------------------|
| Dimension | 330 X 225 mm |
| ST SS 029 | Stainless Steel |
| ST AL 031 | Aluminium |
| ST GS 030 | Galvanized Steel |

SINGLE STEP - DIN EN 13101 TEST - ASTM C497

| | |
|------------|------------------|
| Dimension | 200 X 170 mm |
| HB GS 019B | Galvanized Steel |
| HB SS 019B | Stainless Steel |

NON DETECTABLE WARNING TAPES

GS offers a wide range of Non Detectable warning tapes covering most commonly sought applications including Red & White safety tapes.

DETECTABLE WARNING TAPE

Various tapes for specific utility lines are available with us at Global Source. These tapes have a metallic core for practical, easy and non-destructive detection of utility line's positions.

ADHESIVE ANCHOR

Highly recommended for installation of manhole steps.

A two component high strength adhesive anchoring system is non-toxic and has good chemical resistance. Styrene free and orderless. Has longer workability.

TWISTER SDS-PLUS

Cost Effective drill bits, the tri-zone flute system helps in better dust extraction and faster drilling.

ULTIMAX SDS MAX 646

The massive compact head with 10 cutting elements, helps achieve best lifetime in combination with faster and smoother drilling.

BOOSTER SDS-PLUS

Specially designed to cut through rebar's, with longer service life in addition to the faster and smoother drilling supported by the patented Flute Design.

ULTIMAX SDS MAX

Drill head with 6 cutting edge and progressive flute. Longer service life and fast drilling.

B3 MAX SDS-MAX

3 Cutting Edge Monobloc Tip, and the overall tip design guarantees concentric and cleaner holes.

STOP DRILL BIT SDS PLUS

Combination of 3 cutting edge monobloc tip, with depth stop. Helps achieve best results wherever repetitive control over drilling depth is required

CHISELS

Wide range of chiseling tools available in various Shanks and heads, manufactured with High resistance steel.

SPEEDUSTER SDS-MAX

A combination of the unique 10 edge massive monobloc carbide tip with vacuum assisted dust extraction, helps in a cleaner and healthier worksite.

SPECIFIC CHISELS

Chisels available for various applications like Unique Helical pointed Chisel, with 4 unblocking edge acts as anti-lock during chiseling resulting in easier chiseling.

HSS 901 STEEL DRILL BIT

118° Tip Angle.
N Type Flute.
Standard Cutting.

BLUE CERAM

Diamond tipped head, helps in clean and smooth drilling in various types of ceramic Stones.

HSS 990 COBALT

5% Cobalt.
135° Tip Angle.
Choice for Drilling of Materials difficult to machine.

UNIVERSAL

SAMEDIA Universal Blades can be used for wide range of applications from concrete to limestone.

GRANITE

SAMEDIA Granite Cutting Discs can be used in a wide range of granite and even on concrete.

CONCRETE

SAMEDIA Concrete Blades are designed to give maximum performance on all types of concretes including reinforced concrete.

CUP WHEEL / GRINDING CUP

SAMEDIA cup wheels show unrivalled performance, thanks to samedia special segments.

ASPHALT

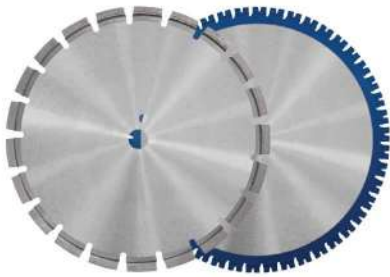

SAMEDIA Asphalt Blades are designed to give maximum performance and durability in asphalt.

TILES & CERAMIC

SAMEDIA Tiles & Ceramic Blades are available in a wide range, classified based on the nature and type of application.

SEGMENTS

Diamond Segments for wide range of application based on the material being cut, cored or finished. From concrete, reinforced concrete, limestone, Asphalt etc.

HOLLOW CORE BLADES

CARBODIAM - Diamond blades dedicated to cut hollow core, prestressed concrete elements and railway slippers, available from sizes 600-1300. Other sizes available on request.

CORE BITS SEGMENTED - DBK

Cost effective, durable coring bits, for use in reinforced concrete, asphalt etc. Special sizes available on request.

POWER TOOLS

We offer a range of power tools from 'Kaizen Cuts' to suit heavy duty requirements of construction sites, such as Angle Grinder, Rotary Hammers etc.. These tools are designed to work in a demanding environment and are lighter on budgets.

CERAMIC ACCESSORIES

SAMEDIA Ceramic Tiles accessories covers wide range of consumables from ceramic core bits to grinding / drilling finger bits.

CORE BITS - CONTINUOUS - DBR

For professional and cost effective concrete coring jobs, the series is designed especially to work with both hand held and stand coring machines
